PROFESSIONAL COURSES

[09/1995 – 10/1995]

"News and Current Affairs", British Broadcasting Corporation (BBC)

[07/06/2004 – 14/06/2004]

Fellow Salzburg Seminar - Session 418 - Reinventing the West.

Research questions: Redefining the Transatlantic Relationship. Does "the West" still exist? Between 1989 and 2003, have we moved from a world with two Europes and one West, to a world with one Europe but two "Wests", an American West and a European West? Coordinating professor Anne-Marie Slaughter, University Professor of Politics and International Affairs, Princeton University

[06/2021 – 07/2021]

"Géopolitique du Proche & Moyen-Orient", Institut d'Études de Géopolitique Appliquée, Paris

Professional course based on training in an in-depth analysis of the complex dynamics that characterize the Middle East and the Near East and on learning key concepts to decipher contemporary geopolitical issues, in particular the strategies of the main regional powers (Iran, Israel, Turkey, Saudi Arabia) and the influence of the United States in the region.

The Threat of Algorithmic Populism: Intelligence Strategies for Safeguarding Democracy

The digital age has facilitated unprecedented transformations in communication, reshaping the way political discourse and influence manifest in democratic societies. Among these transformations, algorithmic populism emerges as a significant phenomenon. This concept, defined by the interaction between political actors, online activism, and algorithm-driven amplification, highlights how extremist or populist political messages gain traction in the digital ecosystem. order.

Cognitive Hegemony: The True Objective of Russia's New Active Measures

The article examines the key tactics and strategies employed by Russia in its covert confrontation with major Western institutions such as the EU and NATO. Ultimately, it aims to unpack how the Soviet-era concept of 'active measures' has become almost synonymous with 'political warfare,' both of which now operate within the broader and evolving framework of hybrid warfare.

Authors: Bogdan-George Rădulescu | **Journal Name:** Intelligence Info | **Volume, Issue and Pages:** vol. 4, nr. 1, pp. 42-57

[2023]

How should intelligence analysis be utilized to counter cognitive warfare?

Cognitive warfare unfolds in the liminal space where military operations intersect with civilian life—where disinformation implants alternative realities in the minds of adversaries, where psychological and informational warfare converge, and where conventional combat coexists with hybrid operations. A key challenge for contemporary intelligence analysis is to determine the appropriate tools and the analytical frameworks necessary to understand and counter this form of warfare.

The Electronic Jihad. How Social Media is Used for Disseminating Terrorist Propaganda

Communication technology—especially social media—has significantly expanded the global reach of terrorist organizations. No group has exploited these platforms more effectively than the Islamic State (ISIS/ISIL/Daesh), using over 150 networks for recruitment and propaganda, often through high-quality media. Professor Martin Rudner coined the term 'electronic jihad' to describe this strategy, marked by propaganda, disinformation, subversion, and attacks on Western moral values.

The postmodern Narcissus in the cyberspace's mirrors

Just as Narcissus fell in love with his own reflection, the postmodern internet user becomes enamored with digital versions of the self—projected, enhanced, and reinvented in online echo chambers. Cyberspace offers the illusion of limitless identity transformation, where individuals playfully shift personas across platforms. Yet this freedom of self-reinvention, fueled by algorithmic structures, raises pressing questions about its psychological and social costs.
